

# TRIPTIK

**Design by**  
Mauro Lipparini

**Description**

The Triptik table breathes new life into a great classic amongst low tables: the low table of variable geometry with superposed pivoting tops. The carefully-considered design of each of its three tops, all softly rounded, recalls the petals of a flower. Their ever-changing combination, depending on the degree of opening of the table, evokes the unfurling of water lilies. This organic table, vibrant and fundamentally adaptable to the varied requirements of its user, will also appeal in terms of the choice of sophisticated lacquer and veneer finishes on offer.

Low table composed of 3 pivoting superposed tops made from 2"/55 mm thick MDF panels and finished in lacquer or veneer. Base in Epoxy anthracite lacquered steel. End stops prevent the tops from rotating beyond the recommended shape. Once unfolded as far as possible, the overall dimensions of the table are 64½"/164 cm x 69"/175 cm. The above-indicated finishes relate to each of the 3 superposed tops, going from top to bottom.
