

# TRIANGLE LEG TABLE

DESIGN BY SIMON JONES

Motivated by the desire to create more space around a circular table, Simon Jones designed the Triangle leg table and bench series. The ends of the rectangular tabletop have been rounded, creating a sociable setting that maximises seating numbers around the table yet keeping the shape compact. The triangular leg section creates the illusion of lightness and provides optimal compatibility with both square- and round chair legs. Crafted in solid oak with an oiled, soaped or clear lacquer finish, this versatile table is suitable for a wide range of private and public dining or office environments.
